

Freedom Index 118-3

Our third look at the 118th Congress shows how every member of the House and Senate voted on key issues such as federal spending, foreign aid, banning a central bank digital currency (House only), and prohibiting government censorship (Senate only).

The scores are derived by dividing a congressman's constitutional votes (pluses) by the total number he cast (pluses and minuses) and multiplying by 100. The average House score for this index is 31 percent (56 percent for the Republicans and five percent for the Democrats), and the average Senate score is 32 percent (59 percent for the Republicans and seven percent for the Democrats). Thirteen representatives and five senators earned 100 percent. We encourage readers to examine how their own legislators voted on each of the 10 key measures. We also encourage readers to commend legislators for their constitutional votes, and to urge improvement where needed.
