

# Why the Establishment Is Afraid of a Second Trump Presidency

Written by [Luis Miguel](#) on March 15, 2023

in, it's not hard to imagine that he will have no qualms about taking an ax to the entire bureaucracy and Deep State that makes up the executive branch. Nor will he see any need to try to play nice with the establishment by filling his cabinet with insiders as he did while in office — one of his biggest mistakes, but one which he appeared to regret after the 2020 election, as evidenced by his attempt to [fill the Pentagon](#) and other areas of the executive branch with true loyalists in the few months before Biden's inauguration.

Hopefully, Trump has learned from his errors and would eschew packing his administration with individuals such as John Bolton and Anthony Scaramucci, who are only there to make sure he doesn't go too far off the establishment plantation. Of course, we can't know exactly what Trump will do, but the Deep State is certainly aware of the possibility that Trump's cabinet would be totally beholden to them this time around.

Another factor is that, unlike any of the other Republican contenders, Trump can only run for one more four-year term and thus is not limited by any of the thoughts of "compromise" that inevitably enter into the thinking of other Republicans who would enter the White House constantly looking ahead at reelection and thus be tempted to settle on many issues in the name of pragmatism.

Again, this is one area where Trump can be argued to have dropped the ball while in office — he played the gentleman on many fronts, perhaps mistakenly believing that he would get the chance to go full-throttle when safely reelected to a second term. It's not an uncommon tactic for presidents. But it's one that didn't pay off for Trump, because he didn't get a hoped-for reelection — making the compromise all for naught.

Fortunately, for Trump, he still has a strong base within the Republican Party that gives him a viable fighting chance to overcome most opposition. And when the debate season begins, it will most likely only play to his favor, as his onstage abilities are superior to anyone else in the field — even, arguably, to DeSantis.

And while money isn't everything in politics, it certainly is an important tool for being able to get a candidate's message out. Thankfully, Trump has built up his own small-dollar donation war chest and network in the form of his Save America SuperPAC. And he also has his own personal fortune, which he may very well end up having to tap into significantly this time around to make up for the lost mega donors.

Thus, while the establishment definitely has it out for Trump, it's very far from over for the man who has a knack for snatching victory out of the jaws of defeat.

After all, we're talking about the man who wrote a book titled [The Art of the Comeback](#).
