

## Letters to the Editor

### The Insurance Amendment

Next to God, the Second Amendment is the single most important issue to me. But far too many people have forgotten the true significance of the Second Amendment. The crazier our society becomes, the tighter we must hang on to our guns. The Second Amendment is the very heart and soul (the very core) of a free people. The Second Amendment is the “insurance amendment” for a free society, and the only insurance we have. Without the Second Amendment, we are at the complete and total mercy of the government and whoever is in charge. This is why the right to keep and bear arms must never be infringed.

All of the other amendments are just words on paper without the Second Amendment to back them up. It really is that serious. Freedom does come at a cost. If you do not understand that, then you do not know what the purpose of the Second Amendment really is: It is so that we the people can protect ourselves, our families, and our country against tyranny — and treasonous politicians who want to destroy America for a one-world dictatorship (globalism).

I take the Second Amendment and all of our rights and freedoms very, very seriously. Our Constitution is still the supreme law of the land, and all politicians must be held accountable to the oath they swore. An oath is about the very integrity of their souls. Mess with our guns, and you will learn what “shall not be infringed” really means. It must not, and will not, be infringed, and any “red flag law” is an infringement!

“Give me liberty or give me death” is as true today as it ever was. We the people of the United States of America draw the line with the Second Amendment, because it is our freedom on the line!

Steven A. Morrow  
Morrison, Colo.

### COVID Nonsense

Why are effective treatments for COVID discouraged, but questionable vaccines demanded?

Fauci claimed getting 70 percent of the population vaccinated would eliminate surges in COVID cases. Gibraltar is 100-percent vaccinated and had such a COVID surge that it had to cancel Christmas celebrations. Ireland is 91-percent vaccinated and is suffering a huge outbreak. Iceland is 82-percent vaccinated and still has heavy COVID cases. Israel is 78-percent vaccinated and is suffering a huge surge of new cases.

Only about 20 percent of the 230 million people in the Indian state of Uttar Pradesh have been vaccinated. Uttar Pradesh introduced large-scale prophylactic and therapeutic use of ivermectin in May through June of 2020. The WHO witnessed this program. In November 2021, the Indian government declared Uttar Pradesh officially COVID-free. In other countries, such as El Salvador, ivermectin is automatically handed out to anybody with COVID symptoms, as well as to their families. But in the United States, physicians can lose their licenses for prescribing it.

COVID vaccination ostensibly helps reduce deaths of people with high risk factors, but it prevents neither COVID infection nor COVID transmission. Serious side effects are a risk. Nevertheless,

authoritarian politicians and bureaucracies (CDC, FDA, NIH, WHO) demand vaccination.

Early treatment of COVID with hydroxychloroquine or ivermectin has repeatedly been shown to be safe and highly effective in relieving symptoms and preventing hospitalization. But Fake News and (political) scientists boldly lie about their safety and efficacy. Many thousands of deaths could have been prevented if these drugs had been widely used as a prophylactic and a therapeutic treatment in the early stages of patients' illnesses. Is the financial benefit of vaccines and campaign donations from Big Pharma more important to politicians than public health?
