“The Smartest Person in the Room” vs. the Election Fraudsters

When attorney Sidney Powell promised to “unleash the Kraken,” most assumed she was simply referring to a lawsuit.

But along with that lawsuit, there is a person: Dr. Navid Keshavarz-Nia, and his resume is beyond impressive. In his affidavit filed with Powell’s Georgia lawsuit on Wednesday, he noted a few of his remarkable qualifications, including “a Bachelor’s degree in Electrical and Computer Engineering and a Master’s degree in Electronics and Computer Engineering from George Mason University, a Ph.D. degree in Management of Engineering and Technology from CalSouthern University and a Doctoral (Ed.D) degree in Education from George Washington University.” In addition, he has “advanced training from the Defense Intelligence Agency (DIA), Central Intelligence Agency (CIA), National Security Agency (NSA), DHS office of Intelligence & Analysis (I&A) and Massachusetts Institute of Technology (MIT).”

He has even been mentioned favorably in, of all places, the *New York Times*. In the article “How One Man Conned the Beltway,” the *Times* noted in September the exceptional work done by Keshavarz-Nia in helping expose Garrison Kenneth Courtney, who ran a scam called Alpha214 to rake in high salaries from industries by promising government contracts. Wrote the *Times*, “In doing cybersecurity and technical counterintelligence work for the C.I.A., N.S.A. and F.B.I., he had spent decades connecting top-secret dots. After several months of working [in the present investigation] he began connecting the dots.” The *Times* added that the people working with him considered him “the smartest person in the room.”

Courtney, 44, is now spending seven years in jail thanks in part to the sleuthing of Keshavarz-Nia. And the good doctor is connecting the dots once again, this time exposing the massive fraud that allegedly gave Biden the victory over President Trump in the presidential election.

In his nine-page affidavit, Keshavarz-Nia stated he has “high confidence that the election 2020 data were altered in all battleground states, resulting in hundreds of thousands of votes that were cast for President Trump to be transferred to [former] Vice President [Joe] Biden.” “These alterations,” he

averred, “were the result of systemic and widespread exploitable vulnerabilities in [the Dominion Voting System and related systems and software] that enabled operators to achieve the desired results. In my view, the evidence is overwhelming and incontrovertible.”

His expert evaluation in this matter stems from his unique talents, education, and experience. “My experience,” Dr. Keshavarz-Nia noted, “spans 35 years performing technical assessment, mathematical modeling, cyber-attack pattern analysis, and security counterintelligence linked to FIS operators, including China, Iran, North Korea, and Russia. I have worked as a consultant and subject-matter expert supporting the Department of Defense, FBI and US Intelligence Community (USIC) agencies such as the DIA, CIA, NSA, NGA, and the DHS I&A supporting counterintelligence, including supporting law enforcement investigations.”

Hammer and Scorecard: Facts, Not Myths

What he has uncovered confirms evidence found by other experts:

The Hammer and Scorecard capabilities are tradecrafts used by US intelligence analysts to conduct MITM [Man In The Middle] attacks on foreign voting systems, including the Dominion Voting System (DVS) Democracy Suite and Systems and Software (ES&S) voting machines without leaving an electronic fingerprint.

As such, these tools are used by nefarious operators to influence voting systems by covertly accessing DVS and altering the results in real-time and without leaving an electronic fingerprint.

Not only is DVS designed not to leave a fingerprint behind, it is also structured so that its owners cannot readily be determined. Keshavarz-Nia discovered that “DVS is comprised of several companies which obfuscate its true organizational and ownership structures. The DVS companies include: 1) Dominion Voting Systems International Corporation, a Barbados corporation; 2) Dominion Voting Systems, Inc., a Delaware corporation; and 3) Dominion Voting Systems Corporation, a Canadian corporation.” He continued:

Designed for deception: Dominion, Smartmatic, and other voting systems have been designed without safeguards and with “back doors” specifically to allow elections to be stolen. *(Photo credit: peshkov/iStock/GettyImagesPlus)*

Based on my counterintelligence experience inUSIC, I conclude that corporate structures were partially designed to obfuscate their complex relationships, especially with Venezuela, China and Cuba; and impede discovery by investigators....

DVS has acknowledged that Chinese made parts are used in its voting machines. However, the company is unwilling to share details on its supply chains, foreign ownership, or its relationship with China, Venezuela and Cuba. In particular, I have seenUSIC intelligence reports showing China's espionage activities in the United States and efforts to infiltrate elections.

Since these countries are our enemies, I conclude that FIS [Foreign Intelligence Service employees] and other operators were involved to influence the outcome of the 2020 election.

"I have conducted detailed analysis of the *NY Times* data sets," he reports, "and have discovered significant anomalies are caused by fraudulent manipulation of the results. In my expert judgment, the evidence is widespread and throughout all battleground states I have studied." This deliberate and intentional fraud is plainly evident in the vote counts that unfolded on November 4 and the following days. "The data variance favoring Vice President Biden continues to accelerate after 4:30 AM EST on November 4, 2020 and continues its momentum through November 9, 2020," Keshavarz-Nia observed. "This abnormality in variance is evident by the unusually steep slope for Vice President Biden in all battleground states on November 4, 2020. A sudden rise in slope is not normal and demonstrates data manipulation by artificial means."

"For example," he notes, "in PA, President Trump's lead of more than 700,000 count advantage was reduced to less than 300,000 in a few short hours, which does not occur in the real world without an external influence. I conclude that manually feeding more than 400,000 mostly absentee ballots cannot be accomplished in a short time frame (i.e., 2-3 hours) without illegal vote count alteration."

He added this: "In my expert opinion, the DVS Democracy Suite, Scytl/SOE Software/eClarity and Smartmatic have not produced auditable results in the 2020 election."

"It is evident," he continues, "that ballots were not properly validated, system records were not kept, and the system experienced considerable instability even several days prior to November 4, 2020 that required DVS to implement software changes at the last minute."

Keshavarz-Nia's affidavit is just one limb of the mythical Kraken sea-monster unleashed by Sidney Powell. But for the Democrats and their media echo chamber (ABC, NBC, MSNBC, CBS, CNN, *New York Times*, *Washington Post*, etc.), his testimony presents an insurmountable problem. He has already been vetted by one of their own — the *Times* — and so they have no opening to attack the credibility of the man or his testimony.
