Schoolchildren Terrorized About Death from “Climate Change”

From [FreedomProject Media](#):

MADRID — Inmates at government schools in Canada and beyond are being absolutely terrorized with “climate” alarmism, to the point that some of them were convinced that they will die in just 8 years unless the United Nations is given more power and money. Scientists have compared the tactics and hysteria to those used by cults and dictators.

The poor children were absolutely terrified. “We are gonna die! I don’t want to die!” screamed one little child during a propaganda session on “climate” forced on 2nd and 3rd graders at a public school in Toronto. A concerned parent who reached out to FreedomProject Media about the scandal, Lejla Blazevik, said her 8-year-old daughter told her the rest of the class had joined in, too.

Her own daughter, Joylaea Blazevic, got home from school after the indoctrination and recounted what happened at school that day: “She’s like: ‘Mommy, they said that we’re going to die in eight years.’” Even believers in the man-made global-warming hypothesis, including child psychologists, told media outlets reporting on the traumatic incident that it was “inappropriate.”

Among other things, the video featured Swedish girl Greta Thunberg scolding adults. The video included the now-infamous remarks: “People are suffering. People are dying. Entire ecosystems are collapsing. We are in the beginning of a mass extinction and all you can talk about is money and fairytales of eternal economic growth. How dare you!” After that, a clock counting down 8 years was shown to the students, causing panic.
