Princeton Physics Professor Discredits Anthropogenic Climate Change Theory

Physics Professor William Happer discredits the negative effects of CO₂ on the planet and whether or not climate change is man-made. He also goes into detail of why the United Nation's models are incorrect despite their overwhelming confidence that significant warming is taking place due to human activity.

The views expressed by the interviewee(s) in this video do not necessarily reflect the views of The New American or any of its affiliates.
