Biden: Mass Death on the Horizon for Unvaxxed. Mass Panic Message Scheduled for Tomorrow.

President Biden plans to deliver another alarmist speech about the [Omicron variant](#) of the China Virus tomorrow on top of the one he sent last week. Americans can only hope Take Two is as warm and friendly.

Americans who aren't vaccinated against the China Virus face a "winter of death," the Sleepy One warned on December 16.

Leaving out "Merry Christmas!" was undoubtedly an oversight, but anyway, the funny thing is, just after Biden uttered the ridiculous remark, vaxxed politicians began turning up positive. So did three vaxxed people on a trip with Secretary of State Tony Blinken.

AP Images

In other words, the vaxxed might not have such a good winter, either. Fully-vaxxed elected officials and politicians have been reporting breakthrough cases for months.

Biden's Message

Sleepy Joe's message of pestilence and a mass die-off was in keeping with his officials' [grim predictions](#) about Omicron.

"I want to send a direct message to the American people," [Biden said](#). "Due to the steps we've taken, Omicron has not yet spread as fast as it would've otherwise done and as is happening in Europe. But it's here now, and it's spreading, and it's going to increase."

Maybe, maybe not. But then came the warning of a gun-metal sky of ash and rain akin to Cormac McCarthy's apocalyptic novel, [The Road](#):

For the unvaccinated, we are looking at a winter of severe illness and death — if you're unvaccinated — for themselves, their families, and the hospitals they'll soon overwhelm.

About 30 percent of 330 millions Americans, or about 100 million people, are unvaxxed. We had better prepare for the worst. If Biden is right, hundreds of thousands of the dead will be carried from homes, then carted to plague pits as they were [during the Black Death](#).

But let it never be said that Sleepy Joe is all doom and gloom. "But there's good news," the *non compos mentis* commander in chief said: "If you're vaccinated and you had your booster shot, you're protected from severe illness and death — period."

That's because "booster shots work."

From there, Biden read from a script that sounds like it was written by an advertising team from Big

Pharma, which is [making billions](#) on selling Virus vaccines to taxpayers.

“So, move now,” Biden concluded. “Move now.”

New Cases

Sadly for Biden, it doesn't look like the vaccines and boosters are working.

Fully-vaxxed Senator Elizabeth Warren announced she had contracted the virus, as did colleague Cory Booker.

“I regularly test for COVID & while I tested negative earlier this week, today I tested positive with a breakthrough case,” Fauxcahontas tweeted. “Thankfully, I am only experiencing mild symptoms & am grateful for the protection provided against serious illness that comes from being vaccinated & boosted.”

Wrote Booker:

I learned today that I tested positive for COVID-19 after first feeling symptoms on Saturday. My symptoms are relatively mild. I'm beyond grateful to have received two doses of vaccine and, more recently, a booster — I'm certain that without them I would be doing much worse.

Maryland Governor Larry Hogan caught the WuFlu, too.

As did three fully-vaxxed people on a plane flight with Blinken.

“Two Air Force crew members on the secretary's flight contracted the deadly disease, the Department of Defense (DOD) confirmed after the trip ended early due to a positive test by a member of the traveling press pool Wednesday,” [Fox News reported](#):

A spokesperson for the Air Force said that both crew members were fully vaccinated and did not come into close contact with the secretary or senior staffers.

“One aircrew member is asymptomatic, while the other is experiencing mild symptoms,” Air Force spokesperson Ann Stefanek said.

At least one of the crew members reportedly tested positive for the virus one day ahead of the press pool member.

The Virus has been breaking through in fully-vaxxed top officials for some time.

Homeland Security Secretary Alejandro Mayorkas, the [Cuban visa fraudster](#), [caught the Flu Manchu](#), as did [top staffers for](#) Biden and House Speaker Nancy Pelosi.

Though [Biden will deliver](#) another everyone-panic message on Omicron tomorrow, the latest incarnation of the Asiatic pathogen doesn't appear all that dangerous.

The South African doctor who first described it [said the symptoms](#) are “extremely mild,” and that half the people she has treated are vaxxed.

Written by [R. Cort Kirkwood](#) on December 20, 2021

“The most predominant clinical complaint is severe fatigue for one or two days,” Angelique Coetzee [told Reuters](#). “With them, the headache and the body aches and pain.”

Those individuals don’t need to be hospitalized, she said.
