

Written by [Luis Miguel](#) on April 14, 2021

Two weeks after receiving the shot, Dr. Gregory Michael, an OB-GYN in Miami Beach, “died after suffering a hemorrhagic stroke apparently resulting from a lack of platelets,” according to the [Palm Beach Post](#).

Michael’s wife believes the vaccine caused the death of her husband. In a heart-wrenching post on Facebook, Heidi Neckelman [blamed the vaccine](#):

The love of my life, my husband Gregory Michael MD an Obstetrician that had his office in Mount Sinai Medical Center in Miami Beach Died the day before yesterday due to a strong reaction to the COVID vaccine. He was a very healthy 56 year old, loved by everyone in the community delivered hundreds of healthy babies and worked tireless through the pandemic. He was vaccinated with the Pfizer vaccine at MSMC on December 18, 3 days later he saw a strong set of petechiae on his feet and hands which made him seek attention at the emergency room at MSMC.

Social-media platforms are doing their part to encourage everyone to get the shot. Back in December, Facebook CEO Mark Zuckerberg said he [would work with Biden](#) to “push” the COVID-19 vaccine. The company also [declared](#) that it will enforce a stricter level of censorship related to coronavirus and vaccinations, removing content it deems contains false claims about COVID-19 vaccines.

Even as Americans are injured by these vaccines, federal law shields the drug makers from liability. Specifically, the National Childhood Vaccine Injury Act of 1986, passed by Congress at the behest of Big Pharma lobbyists, protects vaccine manufacturers from litigation for deaths and injuries caused by their products.

Basically, if a vaccine kills your child or permanently disables you, the vaccine manufacturer cannot be held responsible. Instead, the federal government created a special “court,” in which tax-funded federal lawyers defend the makers of the vaccine, placing taxpayers on the hook for any damages. Billions have already been paid out to injured parties. No other industry enjoys such immunity from liability.

Once blasted as the stuff of “conspiracy theories,” we are now getting closer to an implantable, under-the-skin COVID passport.

Already, the Pentagon’s Defense Advanced Research Projects Agency (DARPA), a secretive agency established at the height of the Cold War and tasked with protecting soldiers from contagious diseases and biological weapons, has [created](#) a “subdermal implant” to detect COVID-19 infection.

The implant not only tests the blood for viruses but also assists in removing the viruses from the blood when used together with a dialysis machine.

The threat COVID [vaccine passports](#) pose to American liberties is a very clear and present danger. Citizens heeding the warning should not hesitate to contact their local state legislatures to vote against such potentially dangerous state mandates.
