

## “Responsible for Hundreds of Thousands of American Deaths”; Calls Mount for Accountability From Fauci, FDA’s Woodcock

Calls are increasing for investigations into Dr. Anthony Fauci’s intentional suppression of inexpensive and easily accessible, *life-saving* treatments for COVID-19.

“If you put [hydroxychloroquine] back out there [as a therapeutic that could work], it’s quite evident that Dr. Fauci, Dr. Woodcock, Rick Bright, are responsible for hundreds of thousands of American deaths,” declared infectious disease expert Dr. Steven Hatfill on Tuesday, April 13, in a damning interview with Steven Bannon on the [War Room](#).

Conveyed Hatfill, “[They were] causing this drug [HCQ] to pick up a bad name, by leaks to the press that were inaccurate about the drug and its safety margin. It was fostered; they didn’t want competition for the vaccines. There’s no other rational conclusion for what happened.”

So-called [trials](#) released back in May 2020, claiming people were dying from HCQ, led physicians and pharmacists to refuse to prescribe or fill HCQ. Americans bought the lie that HCQ would hurt them maybe as badly as the virus itself. Later, these studies were [retracted](#), as it was discovered that allegedly lethal doses of HCQ were being administered to patients, and people were not dying from HCQ.

Today, over [232 clinical trials](#) have been conducted confirming the success of HCQ when administered at the early onset of infection, i.e., within five days of a patient feeling ill, and when combined with zinc, ivermectin, and azithromycin.

Credibly researched papers are also surfacing to demonstrate that Fauci, director of the National Institute of Allergy and Infectious Diseases (NIAID), among others, misled the American people, especially about HCQ.

Two such reports include Dr. Peter Breggin’s “[Dr. Fauci’s COVID-19 Treachery](#),” and Dr. David E. Martin’s “[The Fauci/COVID-19 Dossier](#),” in which the author alleges “numerous criminal violations” by Fauci, the CDC, and others “that may be associated with the COVID-19 terrorism.” A segment from Martin’s paper reads:

Using the power of NIAID during the alleged pandemic, Dr. Anthony Fauci actively suppressed proven medical countermeasures used by, and validated in scientific proceedings, that offered alternatives to the products funded by his conspiring entities for

which he had provided direct funding and for whom he would receive tangible and intangible benefit....

Dr. Hatfill stressed that “HCQ is proven to be effective and costs roughly 60 cents per pill.” Yet had the successful treatment been promoted or advocated, Dr. Fauci and FDA Commissioner Janet Woodcock would not have been allowed to expedite COVID-19 vaccines.

## Death by Politics

Back in July 2020, when Americans were already four months into the government’s lockdown cure to a vastly misunderstood virus, another esteemed physician, New York primary care doctor Vladimir “Zev” Zelenko, started speaking out about the benefits of HCQ and the success of what he’s termed the [#ZelenkoProtocol](#).

In an interview with [Highwire](#) host Del Bigtree, Dr. Zelenko argued that “People are not dying from COVID-19; they are dying by politics.”

As the global medical establishment [recommended](#) mandatory quarantines of both the healthy and the high-risk, and many governments implemented the advice, the price has been devastating — impoverishment, depression, drug use, suicide, abuse, and children foregoing an education.

Thankfully, early on, a few good physicians, such as Dr. Zelenko, had begun urgently investigating treatments that turned out to work.

“Countries like China and South Korea, they were the first to see the virus,” explained the doctor, who has operated his own private practice for more than three decades. “And they were using hydroxychloroquine (HCQ) and zinc.... Also, France’s Dr. Didier Raoult saw some success with HCQ, azithromycin, and zinc.”

“HCQ is 65 years old and used by millions of people for rheumatoid arthritis, malaria, and as prophylactics,” he emphasized. “I knew its safety profile; it’s given to pregnant women, children.... I am very comfortable giving this drug. Zinc is a simple mineral. I didn’t see any problem using all of these FDA-approved medications in a novel way.”

Yet from the beginning, top White House medical advisors, such as Dr. Fauci, aided and abetted by a biased mainstream media, began pushing back on the use of these common, low-cost treatments. The false narrative that HCQ was unsafe was fervently perpetuated by these “experts.” Fauci and others heightened their message, fueling the controversy around HCQ, after former president Donald Trump admitted he was taking the drug with zinc as a prophylactic.

Dr. Zelenko’s approach — a combination of HCQ, zinc, and azithromycin — saw an incredibly good result: “two deaths out of 800 in the high-risk category.”

Since even before the first COVID-19 infection was detected in the United States, in a nursing home in Kirkland, Washington, doctors around the world have [studied](#) the enormous benefit of using HCQ to fight the virus. They have been called to action to inform citizens, government officials, and physicians that denying HCQ to a patient should be considered malpractice. Yet the fearmongering narrative of the mainstream media and “experts,” such as Fauci and Woodcock, denounced these findings and censored these ideas as “misinformation.”

It is the “arrogance of the elite who are monopolizing the flow of information. Their opinions matter and they consider our opinions not valid. That is such a level of arrogance,” remarked Dr. Zelenko.

As radio talk-show host Dennis Prager has boldly stated for the past year:

These drugs (along with zinc), which are as safe as any medicines humanity has taken in the last half-century, should have been almost universally used to treat COVID-19 patients as soon as those patients showed symptoms or tested positive — and even as a prophylactic to prevent or minimize the effects of the illness in the first place. If they had been, it is likely that tens, maybe hundreds, of thousands of those who died of the virus would have lived.
