Vaxxed Pelosi, Biden, Hill Staffers Catch China Virus. Vaxxed GOP Rep Quarantined

More evidence shows that vaccines against the China Virus aren't all they're cracked up to be.

Staff members of the White House and leftist House Speaker Nancy Pelosi (D-Calif.) caught the virus from the crazy Texas Democrats who fled the state to avoid voting on a voter-fraud bill.

As well, Florida GOP Representative Vern Buchanan announced that he contracted the virus.

The virus struck the three after they were vaccinated, as were several other White House and congressional staff members who caught the virus, the [website reported](#).

The report from *Axios* follows [news from England](#) that almost half of all new virus cases have received at least one vaccination shot. More than 100 sailors on the aircraft carrier *HMS Queen Elizabeth* came down with the Asiatic bug after they had both injections.

“Breakthrough Cases”

The White House official and Pelosi staffer are only “mildly symptomatic,” [Axios reported](#), but they “illustrate how Americans inoculated against the coronavirus can still contract and, potentially, unknowingly transmit the virus — even at the highest levels of the nation’s government.”

Amusingly, the Pelosi staffer and the White House official joined the ballyhooed gaggle of pro-vote-fraud Democrats at a reception. The gang fled Texas to escape voting on a bill to require voter ID and stop the state from sending out unsolicited, mail-in ballots.

The photo of the superspreader flight depicts a smiling gaggle of brave and stunning — and maskless — leftist women.

“The Pelosi staffer helped usher a delegation of Democratic Texas lawmakers around the Capitol last week,” *Axios* noted. “Six of those lawmakers, who flew to Washington to block the Texas legislature from changing the state’s voting laws, have since tested positive.”

[Reported Axios:](#)

“In accordance with our rigorous COVID-19 protocols, the official remains off campus as they wait for a confirmatory PCR test. The White House Medical Unit has conducted contact

tracing interviews and determined no close contacts among White House principals and staff. The individual has mild symptoms.”

The official added: “The White House is prepared for breakthrough cases with regular testing. This is another reminder of the efficacy of the COVID-19 vaccines against severe illness or hospitalization.

And White House spokeswoman Jen Psaki confessed that the staffer who met with the Texas Democrats was only one of “multiple breakthrough cases.”

Buchanan, Congress

Meanwhile, the fully-vaccinated Buchanan also caught the China Virus. He was tested “after experiencing very mild, flu-like symptoms” and is quarantined at home.

[Continued Axios:](#)

Brian P. Monahan, the attending physician of Congress, said in a congressional coronavirus update emailed to lawmakers on Tuesday that several “Congressional staff members and 1 Member of Congress have acquired infection” after being vaccinated.

He urged those who are unvaccinated to “come for vaccination at any time.”

The big picture: COVID-19 cases are on the rise across the country, with health officials becoming increasingly worried about the Delta variant. It’s significantly more infectious than the original strain, and it poses an acute threat to the unvaccinated.

Concern about the Delta variant of COVID-19 is causing some places to consider reinstating mask recommendations.

Are Vaccines Working?

As [The New American reported](#) on Monday, citing the *Daily Mail*, almost half of new China Virus patients in Britain are vaccinated.

“King’s College London scientists estimated 33,118 people were catching the virus daily in the week ending July 10, compared to 33,723 in the previous seven-day spell,” the [newspaper reported](#):

But 47 per cent of cases are among those who have received at least one dose of the Covid vaccine, surging upwards from around a quarter at the start of June.

Many of those vaccinated had received only one inoculation, but even those who have received two also catch the virus, which is believed to be a variant of the original.

In addition to the fully vaccinated sailors, Britain’s Health Minister, Savid Javid, also caught the Asian bug, which experts believe [escaped from](#) a lab.

“This is worrying me quite a bit” mRNA vaccine inventor Robert Malone tweeted to answer a thread that shows the vaccines are not stopping the disease.
