No Evidence? Nevada DMV Data Reveals Thousands of Non-citizens Voted in 2020 Election

Information obtained via subpoena by the Nevada Republican Party from the state's Department of Motor Vehicles [revealed that thousands](#) of non-citizens not only were registered to vote, but actually cast ballots in the 2020 election.

The fraudulent votes were cast thanks to the DMV's registering of all those who applied for driver's licenses. Since legal and illegal "non-citizens" can hold driver's licenses in the state, it's easy for them to get registered to vote if the DMV employees "do their due diligence."

The information obtained under a subpoena displayed green-card holders and non citizens who had obtained driver's licenses. Based on the official data set, the Nevada GOP "compared this detailed information against the county voter records in Nevada" and "discovered that 6,260 non citizens were registered to vote and 3,987 non-citizens had voted."

In a signed statement "under the penalty of perjury," the group's data analyst Jesse Kamzol outlined his findings, which he emphasized "merit further investigation."

Kamzol explained his [findings](#):

6,360 positive matches were made from within the DMV file to the Voter File

6,136 (96.5%) of those matched voter registration records have voter registration records that are "active"

3,987 (62.7%) of those matched voter registration records voted/cast ballots that appear to have been counted — meaning, they are not shown as being provisional or rejected mail ballots per data collected from the SoS and/or County Elections Divisions

4,546 (71.5%) of those matched voter registration records appear to have attempted to vote, including provisional votes and rejected mail ballots per data collected from the SoS and/or County Elections Divisions.

The Nevada GOP argued that the apparent loophole allowing non-citizens to register to vote is "by design."

"The first question is 'Are you registered to vote?,' while the second question, 'Are you a US Citizen?'. Seems like the order should be reversed," the party wrote, going on to declare, "One of our most basic checks in the electoral process, that this sacred right is limited to those with the privilege and responsibilities of citizenship, was subverted by the DMV."

Furthermore, the GOP took aim at the state's executive branch:

And where are our law enforcement officers? We found this evidence without the help of our Top Cop in Nevada. Attorney General Ford: why are you not investigating voter fraud? You've made your position very public saying that you will investigate and prosecute voter fraud.

Yet, we have blatant vote buying, non-citizens receiving and casting ballots, deceased voters, people voting twice, etc. and you choose partisan politics to ignore the hundreds of pages of evidence while continuing the narrative that there was NO fraud.

DO YOUR JOB!

A [hearing in Nevada](#) from earlier this month outlined much evidence of voter fraud.

For example, the United States Postal Service (USPS) is "preventing witnesses and whistleblowers from testifying" concerning orders for workers to deliver ballots to nearly 8,000 "undeliverable" addresses.

Some other notable facts unearthed by a data scientist who testified to over 100,000 unique cases of illegal ballots: Almost 20,000 Nevada voters had a non-Nevada mailing address; approximately 8,000 voters had registered addresses that are physically non-existent; approximately 15,000 voters are registered to vote at either a commercial address or a vacant property; and 42,000 voters voted twice and have multiple voter registration numbers associated with substantially the same name, birthdate, and address.

Subpoenas are being issued in other states, shedding light on abundant evidence of voter fraud, counteracting the repeated talking point from the mainstream media that such evidence doesn't exist.

In Michigan, the [legislature granted](#) the state's Senate and House Oversight Committees subpoena powers, which will allow them a broader range to investigate allegations of voter fraud in the 2020 election.

Under the subpoena powers, counties are being asked to provide all information used by the Absentee Voter Counting Board, along with scanners, voting machines, and the list of workers hired to be adjudicators.

One of the potential paths to victory for President Trump is playing out in Congress, where Representative Mo Brooks (R-Ala.) is leading an effort to object to the Electoral College votes where widespread fraud occurred, an effort set to occur when the votes are counted on Capitol Hill on January 6.

It is thus important that evidence of voter fraud continue to be found and released to the public so that lawmakers can be pressured to make the right decision, and so that American constitutionalists are sufficiently informed to withstand backlash from the Left, who inevitably will brand an attempt to save the election as an attempt to "steal" it.
