Texas GOP Platform Puts New World Order in Crosshairs, Provides Hope for Americanism

Texans aren't messing around. The 2022 Texas GOP platform takes aim at the New World Order and many irrational and destructive stances that have resulted in societal decline on all fronts. It also names several unconstitutional federal agencies that need to be shut down.

"We reject any assertion of authority over our nation or its citizens from foreign individuals or entities, such as the World Economic Forum, World Health Organization, and the United Nations. We reject the concept of a One World Government or The Great Reset," says plank 272 of the [Texas GOP 2022 Platform](#).

The platform committee also recognizes the U.S. needs to get out of the United Nations and kick the UN off U.S. soil. "The United Nations is a detriment to the sovereignty of the United States and other countries; because of this we support ... Our withdrawal from the current United Nations."

This isn't the first time Texans have recognized an NWO threat, but this latest platform is too beefy to ignore.

International organizations like the UN, with its various slimy tentacles, i.e., the [World Health Organization, have always worked against national sovereignty and individual liberty](#). The core reason for their existence is to establish a one-world government.

The UN is a vehicle by which the powerful international oligarchical class seeks to establish a world in which you will own nothing and they everything. This would be a totalitarian order, not a "democratic" one, despite any lies or naïve misunderstandings to the contrary. The UN was established and has been led by communists or socialists ever since its creation in 1945. One of its founders was Alger Hiss, who at the time was both a U.S. State Department official and Soviet spy. Over the years, the UN has not only failed to facilitate the peace it was supposedly created to foster, but wreaked havoc in third world countries via its [uber corrupt and unethical employees](#). Today, UN member countries include China, North Korea, Russia, and several African and South American collectivist states. Clearly, the UN has no qualms with admitting states that harvest their citizens' organs, or jail and kill people for saying mean things about their homicidal leaders.

Throughout the decades, the international oligarchical class has used various strategies and hoaxes to destroy nations, impoverish people, and fool the public into giving up its liberty. The Covid tyranny scheme was one such tactic. The UN's [verifiably ultra-corrupt World Health Organization](#) played a major role in directing the global authoritarian collaboration and greatly contributed to the death toll across the planet. The WHO was viewed as an authority on treatment, contagion containment protocols, and "vaccine safety." If those were the true goals, it failed miserably. It derided and suppressed

effective treatment, it profoundly exacerbated societal problems via lockdowns, and it did nothing to protect people from damaging “vaccines.” Unless its goal was to make people sicker, poorer, dead, and less free, it made everything worse.

Before the flashy Covid-19 trick, which many are no longer falling for, the NWO fooled people with the more effective and elaborate climate “crisis” scheme. Now that scam is back up top in the globalists’ bag of tricks.

Human-caused climate degradation is proving a more effective scam because, whereas with the vaccine people you knew were dropping dead or waking up paralyzed, with climate alarmism you’re told the problem is *impending*. Sure Miami is there now, but it’ll only be there tomorrow if you dump your diesel pickup, slaughter all the farting cows, and turn off the air conditioning. *Just trust us*. Climate propagandists also like to use statistical wizardry. They blame supposed human-caused climate change for supposedly increasingly intense natural disasters. For instance, you’ll hear that because climate-caused natural disasters are getting worse, it’s costing us more. But what they won’t tell you is the reason it may cost more is because there is more infrastructure to destroy than there was fifty years ago, not because the weather disasters have intensified. This point was made by Dr. Steven Koonin, who served as the under secretary for science in the Department of Energy under Barack Obama. Koonin wrote the book [Unsettled: What Climate Science Tells Us, What It Doesn’t, and Why It Matters](#).

Massive resources and efforts have been poured into propaganda to brainwash people into believing the earth will implode next week and everything that supports our current standard of living must be eradicated. The UN has implemented policies via “soft law,” which is centralized governments or private companies bribing states or small localities with tax breaks or outright cash “aid” to follow ever-more stringent eco-standards. This, again, is all for the ultimate goal of ushering in world government. Terrify the people that their planet is falling apart, and they’ll do anything to preserve themselves, even live in serfdom. That’s the idea, anyway.

But it sure seems like the good folks in the Lone Star State aren’t buying it. They’re keeping their cows and gasoline pickups and raising the bet to kicking the NWO to the curb. They also have planks to safeguard reliable energy production, end the Federal Reserve and its money-manipulating con, protect the lives of the unborn, help re-establish a sane human order that recognizes basic biology, and eliminate several federal unconstitutional agencies. Plank 17 calls for the abolition of the Department of Education because it’s not an “enumerated power of the federal government.” This is true. It was also true in 1979 when the horrendous and stupidly inefficient department was created under the equally inept Jimmy Carter administration. Nevertheless, the call for agency elimination gets even better in the meatier Plank 236. Texans also want to get rid of the IRS, HUD, HHS, TSA, ATF, FDA, CDC, FDIC, OSHA, and “any other federal agency or department that is not authorized by the Constitution.”

Aside from one major glitch, this platform is one that, if implemented, would make America freer, richer, and saner. It’s hopeful to see the dominant party of a state like Texas wake up.

This awakening, which is not exclusive to Texas, didn’t have to take so long. The information about the true purpose of the UN has been available for a very long time. The John Birch Society, parent company of this magazine and my employer, warned about the UN a very long time ago. JBS Founder Robert Welch said in 1958, during the meeting that created the Society, that a plan existed “to induce the gradual surrender of American sovereignty, piece by piece and step by step, to various international organizations—of which the United Nations is the outstanding but far from the only example.” He made several [predictions regarding the Insiders’ plans for America](#), many of which have unfortunately already

come to pass. To help prevent a globalist takeover, JBS launched the [Get US Out! of the UN](#) action campaign in 1962. Over the years, the JBS has launched several other campaigns intended cut at the root of the conspiracy to destroy America and usher in global totalitarian government. Some of those campaigns include [Stop the Globalists' Trade Agenda](#), [Get US! Out of the USMCA](#), [End the Fed](#), [Stop Agenda 21/2030](#), [Support Your Local Police and Keep Them Independent](#), [Restore Election Integrity](#), and [Save Our Children From Public Schools](#).

There is only one major glitch with the Texas GOP platform, and that is its calling for the seductive yet dangerous Article V Convention, to supposedly create Republic-saving amendments to the Constitution. [One problem](#) with all this is that you don't want to get anywhere close to opening the door to the Constitution today. Our congressional halls are swarming with Marxists and full-blown communists and fascists salivating at the idea of rigging a convention and destroying the Constitution. Furthermore, there is nothing wrong with the Constitution. If you want to decimate the deficit, eliminating the unconstitutional agencies will eradicate 80 percent of our national budget. And if you're so eager to impose term limits, just vote out the congressmen who don't adhere to the constitution. Whether they have an R or a D next to their name, if they're not obeying the Constitution, get them out. The JBS has made that easy, too. Check out the [Congressional Scorecard](#) for more on that.

Nevertheless, Texas is showing — for the most part — that it understands the threat and is willing to lead. Anyone who wants to impose their totalitarian vision onto the free people of the United States should take note. Don't mess with Texas — and don't mess with America.
