## Covid Lessons From the Holocaust

Numerous parallels exist between the history of the Holocaust and the current Covid drama, from demonization of the “unclean” (Jews or unvaccinated) and the use of experimental medicines on human “guinea pigs,” to extermination of those so-called unfit and deemed “useless eaters” and “disabled.”

Joining *The New American* to discuss these comparisons are two people intimately familiar with these issues. Scott Schara is president of [Our Amazing Grace’s Light Shines On](#), a nonprofit he established after losing his daughter, Grace, in a Covid hospital last October. Vera Sharav, founder and president of the [Alliance for Human Research Protection](#), spent time as a child in a German concentration camp and has dedicated her adult life to trying to expose criminal medical experimentation on vulnerable populations.

Their stories provide warnings against the groupthink that has made lockdowns, quarantines, and government vaccine mandates “normal,” and caution Americans to defend their already eroded liberties before they are lost entirely.

This is Part 1 of a two-part interview with Scott and Vera. [Click here](#) for Part 2.

## Subscribe to the New American

Get exclusive digital access to the most informative, non-partisan truthful news source for patriotic Americans!

Discover a refreshing blend of time-honored values, principles and insightful perspectives within the pages of "The New American" magazine. Delve into a world where tradition is the foundation, and exploration knows no bounds.

From politics and finance to foreign affairs, environment, culture, and technology, we bring you an unparalleled array of topics that matter most.
