The American people can and must take certain urgent actions to make sure the 2026 elections are honest and secure, and everything is at stake in this particular battle, explained recently released elections leader and former Mesa County Clerk Tina Peters in an exclusive interview with The New American magazine's Alex Newman for Behind The Deep State.

Peters, who spent almost two years in a Colorado prison for trying to preserve evidence of voter fraud in 2020, said that right now the Senate is holding up nominations for a key federal body. That body has the power (and the duty) to decertify the voting machines. She also pointed to the large number of fake registered voters as key.

After meeting with President Trump, Peters is currently in D.C. working with some of the nation's top leaders in this field. She says God has sustained her through all of this. And now, she is urging YOU to get involved in this essential battle.
