Dr. Meryl Nass: INSANITY of New Covid Boosters

Last week, the FDA and CDC signed off on the first updated Covid boosters by Pfizer and Moderna that supposedly target the latest subvariants of the omicron strain.

While the Biden administration is spending millions of dollars on untested experimental shots, confirmed medical data suggest that the more you boost against Covid, the more likely you are to get it. Plus, every dose of the Covid shot increases your chances of having serious adverse reactions.

In this interview with *The New American*, Dr. Meryl Nass detailed the disastrous safety and efficacy data for the omicron boosters, which were not even tested in humans, and warned people against taking them, calling it “insanity.”
