# Dr. Robert Malone: Restore Integrity, Dignity and Community

Dr. Malone attended the Defeat The Mandates rally to support the Front-Line COVID-19 Critical Care Alliance doctors — an international group of some 17,000 physicians who developed and successfully used various early treatments for COVID-19. Dr. Malone also offered Americans a message of hope and unity.

Dr. Robert Malone is internationally recognized as the chief architect of mRNA vaccine technology. He has also become one of the most recognized and outspoken critics of the heavy-handed government response to the pandemic.

While working at the Salk Institute in 1988, Dr. Malone discovered important findings about in-vivo and in-vitro RNA transfection. He continued his work on technology a year later at the biopharma start-up Vical where he conducted additional experiments. According to his bio, "The mRNA, constructs, reagents were developed at the Salk institute and Vical by Dr. Malone." His research has also included important work on DNA vaccines. Malone is also a medical doctor, and received his medical training at Northwestern University (MD) and Harvard University (Clinical Research Post Graduate) medical school, and in Pathology at UC Davis.
