LINDELL CYBER SYMPOSIUM: Dr. Douglas Frank and Col. Kurt Hyde on Election Fraud and Election Integrity

William F. Jasper interviews physicist/mathematician/computer expert Dr. Douglas Frank and election historian/systems analyst Col. Kurt Hyde at Mike Lindell's Cyber Symposium in Sioux Falls, South Dakota. Dr. Frank explains his discovery of the mathematical algorithms that he believes were used across the country in 2020 to commit massive election fraud. Col. Hyde discusses the many inherent vulnerabilities of electronic voting and the necessity of returning to paper ballots and auditable paper voter registration to restore election integrity. In his first article on this topic for The New American in 1986 (35 years ago) he warned that digital voting would create the election problems that we face today.
