The Truth Behind the Lab Leak “Theory”

Prior to the World Health Organization’s pandemic declaration in March of 2020, Steven Mosher - an expert on China - tried to warn everyone he could that the novel coronavirus just starting to make headlines was actually genetically engineered and deliberately released from a lab in Wuhan, China.

For his efforts, he was banned on social media and labeled a crackpot conspiracy theorist. These days, people understand the value of such flattery.

Mosher recently published his research in a new book called [The Politically Correct Guide to Pandemics](#), a must-read for those who want to understand not only the origin of Covid-19 but the purpose behind it. He sat down with The New American to discuss the book and a new six-part [video series](#) based on it, produced by the [Population Research Institute](#), for which Mosher serves as president.
