The efforts to redesign humanity through transhumanism and society through technocracy are running in parallel as the elitists behind it seek to hijack “evolution” and become “gods” themselves, explains historian and technocracy expert Patrick Wood in this episode of Conversations That Matter with The New American magazine’s Alex Newman. Wood, who just released the book on the subject called *The Evil Twins of Technocracy and Transhumanism*, argues that this effort is guided by scientism, a religious fervor that has nothing to do with science. Perhaps most alarming, Wood explains that these evil forces are hoping to create new forms of life as they seek to catalog and exploit the DNA of every living organism for the benefit of technocracy, transhumanism, and bio-tech interests.
